

Investment

The financial world around us is particularly complex and not always easy to access. Understanding this area in depth requires time, thoroughness and passion. Blockchain technology and cryptocurrency markets are often unclear and not always well understood. This is why, at Insula Investment, we are happy to be able to support you by offering our expertise in several areas of consulting. For us, your investment must be in accordance with your desires. This is why we offer a wide range of consulting offers. Thus, we are sure that we can respond correctly to your wishes.

What kind of consulting do we offer?

We offer different kinds of consulting offers. The most obvious of all is a consulting session by telephone or videoconference. This session is recommended in advance for all clients wishing to invest in Insula funds or in its liquidity pool. It is also possible to have access to other more specific offers, tailor-made for the client. This ranges from legal consultation to quantitative or market research, including advice on cybersecurity, investment strategies, intellectual property and so on. For more information, please refer to the dedicated website page: <https://www.insulainvestments.com/book-online>

Our Pricing

At Insula, all services are invoiced in Insula Token. We have decided to use a single pricing policy. Each service is calculated according to the time spent. The hourly price is posted on the Insula Investment website. In order to always offer a fair price to our customers, Insula uses a Halving strategy. Insula will therefore divide the price per hour of its services each month (if necessary).

Insula offers its potential customers a free 15-minute videoconference session. Thus, we can introduce our offers and answer the first questions of our future customers.

Our partnerships

Our consulting offer being broad and embracing complex topics, at Insula we decided to surround ourselves with expert partners in very specific fields. Thus, we can maintain our course of action: always offer high quality work to our customers.

We also have a tab on our website allowing any potential partner to apply. We will be happy to respond favorably to this request if the partnership seems ideal for us, for you and especially for our customers.
